

Toys

Home Learning Challenge

Have a look at your toys at home. Can you find a toy that can move, a toy that makes sounds and a toy that lights up? How do you make them work? Do you need to push a button? Do they have batteries? Do you wind them up? Talk to a grown-up about the different ways your toys work.

Draw a picture of your favourite toy.

Have a look at your toys. Can you find a toy with numbers on? Look at the numbers carefully. Can you see numbers 1, 2, 3, 4 and 5?

Talk to a grown-up in your family about the toys they used to have when they were little. Find out if they had any toys that are similar to toys that you have got. How were their toys different? What was their favourite toy?
